Title: Depressive and anxiety disorders in patients presenting with physical complaints: Clinical predictors and outcome

Author(s): Kroenke K (REPRINT) ; Jackson JL; Chamberlin J

, 1997

Abstract: PURPOSE: TO identify the predictors of depressive and anxiety disorders in general medical patients presenting with physical complaints and to determine the effect of...

...of a physical symptom were interviewed with PRIME-MD to diagnose DSM-IV depressive and anxiety disorders. Clinical predictors were identified by logistic regression analysis. Outcomes were assessed immediately postvisit and...

...care, clinician-perceived patient difficulty, and health care utilization and costs.

RESULTS: A depressive or anxiety disorder was present in 146 (29%) of the patients. Independent predictors of a mental disorder included recent stress, multiple physical symptoms (ie, 6 or more), higher patient ratings of symptom severity, lower patient...

...of the encounter as difficult, and patient age less than 50. Patients with depressive or anxiety disorders were more likely to have unmet expectations postvisit (20% versus 8%, $P < 0.001$...

...considered difficult (26% versus 11%, $P < 0.0001$), and report persistent psychiatric symptoms and ongoing stress even 3 months following the initial visit. Psychiatric status was not associated with symptomatic improvement...

...with physical complaints identify a subgroup who may warrant further evaluation for a depressive or anxiety disorder. Such disorders are associated with unmet patient expectations and increased provider frustration. (C) 1997...
